Hose Installation Guide

Use - Maintenance - Conservation - Shipment & Storage

Hoses have a certain life-time. Users must necessarily choose the hose that suits best to the work to be carried out. In case the work to be carried out brings about risks, users must use a hose of a nature enabling elimination of all possible risks.

Particularly, users must pay ultimate attention to opted hose in case of high operating pressures. Hoses must not be used for any purpose other than those that are met for design specifications. The hose must be used in such a way that there should be no sharp bending.

Hoses must not be used under such pressures higher than operation pressures specified in their design characteristics. During hose use, there must be no sudden pressure increase, however, the pressure must be increased gradually. Hoses must not be kinked, and forced by associated apparatuses and devices during use. When carrying big-size heavy hoses, attention must be paid for proper carriage by using hangers or carriage equipments. Particularly, in AV heavy duty hoses, proper supporting apparatuses must be used.

During storage, hoses may negatively be affected from ozone, sunlight, oils, solvents, smoke, corrosive liquids, insects, rodents and radioactive materials. Proper storage for hoses depends on diameter and length size, quantity and packaging type of the hose. If hoses are bundled, bundles must not be stowed vertically but horizontally. Generally, wire braided and heavy hoses should be placed at the bottom while light hoses should be superposed.

If possible, hoses must be stored in their original packaging. If hoses are stored in cases, wood or cardboard cases should be preferred. Ideal storage temperature is 10-20 °C. Avoid storing at temperatures higher than 38 °C.

Unless otherwise specified in their design, hoses harden under 0 °C. Therefore, they must be restored to operating temperature range, if possible, before use. Hoses must be kept away from heat sources (radiator, stove, etc.) and hot surfaces. They must not be stored at such environments with high and low humidity conditions. Hoses are negatively affected from conditions of high ozone concentration. They must be protected from direct or reflecting sunlight. Lights emitted by florescent and mercury lamps have detrimental effects on unpackaged hoses. Storage area should be relatively cool and dark, and free from mold and humidity. When using hoses, FIFO (First In, First Out) principle should be preferred for moving out of storage area. If foregoing instructions are observed, the life of hose will be prolonged.

Subject to the foregoing, Seller shall defend any suit or proceeding brought against Buyer on a claim that a Product sold under this Contract, or any part thereof, directly infringes any third party intellectual property right, provided that Seller is notified promptly in writing and given all necessary information, assistance

and authority to defend the same.

<http://www.eaton.com/Eaton/ProductsServices/Hydraulics/WarrantyTermsConditions/index.htm> or www.selhoses.com.

SELLER WILL HAVE NO OTHER OBLIGATION WHATSOEVER WITH REGARD TO THE GOODS EXCEPT AS STATED IN THE WARRANTY. THE WARRANTY IS EXCLUSIVE AND SELLER HEREBY EXPRESSLY DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT SHALL SELLER BE RESPONSIBLE FOR INCIDENTAL, CONSEQUENTIAL, PUNITIVE OR LIQUIDATED DAMAGES.

14.1 Defects notification: The Buyer shall notify the Seller of defects (including, but not limited to, incorrect or insufficient deliveries) in writing and without delay. Such notice shall no longer be deemed "without delay" when it is not given within ten (10) business days; this deadline shall be deemed to have been met if the notice is posted within this period.

14.2 The Seller shall not be required to remove a defective item from a different item or system (not supplied by the Seller) in which the defective Product is integrated. Subject to applicable laws the Buyer's right of recourse against the Seller shall only exist subject to prior written consent by Seller.

15. Cancellation

Changes and/or cancellations to existing schedules or orders are subject to Seller's acceptance and any applicable cancellation charges (and possible increase in per piece price due to reschedules). Cancellation charges will be determined by the type of product and the stage of completion. Cancellation conditions and charges for special product will be based on the selling price less amounts saved at the time of cancellation. In any and all cases, Buyer may not cancel any order at least twenty (20) business days before the originally scheduled delivery date. Seller will accept temporary holds on orders for rescheduling purposes for a period not to exceed thirty (30) days. If at that time a reschedule is not received, Seller reserves the right to recommence shipments in accordance with the original schedule or cancel the order.

16. Returns

No products shall be returned to Seller, whether for inspection, repair, replacement, or any other reason, without prior written approval from Seller, failing which Seller will not bear or be responsible for any related costs and risks. Products and parts must be returned in new or like new condition with complete identification in accordance with our instruction

or the shipment may not be accepted. Where authorization has been obtained to return products and parts for reasons beyond warranty, a restocking charge of twenty five percent (25%) and any additional transportation charges are applicable.

17. Minimum Order

Minimum order amount is EUR 5000 (five thousand Euros), or the equivalent amount in the currency applicable to the sale, unless otherwise approved in writing by Seller.

18. Remedies

Any lawsuit or legal claim for breach of this Contract must be brought within one (1) year after the breach occurs. This does not affect Buyer's obligation to inspect the condition of the purchased object as soon as feasible in the normal course of business and, if he discovers defects for which Seller is liable under Warranty, to notify Seller without delay (Art. 201 par. 1 of the Swiss Code of Obligations).

19. Currency

Unless otherwise indicated on the Quotation, order acknowledgement or invoice, all payments are to be made in the currency indicated by Seller on the invoice.

20. Compliance with Laws

20.1 Seller shall comply with all laws and regulations to which Seller is subject pertaining to the manufacture of the Products. For the avoidance of doubt, "laws and regulations" do not include recommendations of standard-setting organizations. Seller shall not be responsible for noncompliance with laws arising out of combination, operation or use of the Products with products not supplied by Seller where use of the Products without such combination, operation or use would be in compliance with such laws.

20.2 Customer shall obtain all licenses, permits and approvals required by any government or applicable authority, including any recycling or take-back programs applicable to packaging of Products, and shall comply with all applicable laws, rules, regulations, policies and procedures and any requirements applicable to the importation, exportation, use, sale, loan, purchase, destruction and distribution of Products under any laws and regulations, of any government or other competent authority where the Products are to be used or deployed (collectively, "Applicable Laws"). In the event of any third party claim against Seller relating to the foregoing, Buyer shall provide all necessary information and assistance in the resolution of the claim and Buyer shall indemnify and hold Seller harmless against any such third-party's claim. Buyer warrants that it shall not take any action or permit or authorize any action that will render Seller liable for a violation of the U.S. Foreign Corrupt Practices Act and any applicable local law, which prohibits the offering, giving or promising to offer or give, directly or indirectly, money or anything of value to any official of a government, political party or instrumentality thereof in order to assist it or Seller in obtaining or retaining business. Seller strives to maintain the highest standards of business integrity. If Buyer has any cause for concern regarding any business practices these should be reported to Seller.

Buyer acknowledges that the failure to comply with all such Applicable Laws and/or Seller's policies will be deemed a material breach of this Contract, and shall entitle Seller to terminate this Contract (in addition to any other remedies Seller may have at law or equity). Buyer agrees to indemnify, defend and hold Seller harmless from any breach of Buyer's obligation under this clause.

21. Export, Re-export, Transfer and Use Controls

The Products (or Services) supplied by Seller under this Contract may be subject to export controls under the laws and regulations of the United States (U.S.). Buyer shall comply with such laws and regulations governing export, re-export, transfer and use of Seller Products and will obtain all required U.S. and local authorizations, permits, or licenses. Seller and Buyer each agree to provide the other party with information, support documents, and assistance as may reasonably be required by the other in connection with securing authorizations or licenses. Buyer's obligations under this clause shall survive the expiration or termination of this Contract.

22. Termination

22.1 If a party breaches any of the provisions of this Contract, the non-breaching party may terminate this Contract as follows:

- (a) immediately upon providing written notice to the breaching party if the breach is not capable of being cured, and
- (b) thirty (30) days after providing written notice to the breaching party if the breaching party fails to cure such breach within such thirty (30) day period.

22.2 The termination of the Contract in any way whatsoever will be without prejudice to the rights, obligations and liabilities of either party accrued prior to termination.

23. Bankruptcy

If bankruptcy proceedings are instituted against any contracting party or an application for bankruptcy proceedings against that party is not granted for insufficiency of assets, the other party may terminate the contract with a prior written notice subject to any applicable mandatory law. Notwithstanding the foregoing, the Seller's title to the delivered goods shall not be affected by the bankruptcy and/or insolvency proceedings. At its discretion and at any time, Seller shall be entitled to enter the Buyer's premises and re-take possession of any goods that have been delivered but remained unpaid by the Buyer.

24. Assignment

Seller shall be entitled to delegate, transfer or assign its rights and obligations arising from the Contract, in whole or in part, to any affiliate company which is owned, directly or indirectly, by Eaton Corporation. Seller may, without Buyer's consent, assign the right to receive any amount due.

25. Personal Data Processing

In performing the Contract as defined, the parties may have access to one or more databases, applications, reports, documents and/or other information in hardcopy or electronic form that contain or process data relating to identified or identifiable individuals ("Personal Data"). Such individuals may include employees, temporary workers, contractors, consultants, students, customers, end-users or other business partners. Each party acknowledges that Personal Data, in whichever form, is of a very sensitive nature, and hereby undertake to treat Personal Data strictly confidential and to use them only within the limits authorized by Seller. If necessary and upon request of Seller, Buyer shall procure from its employees, agents or sub-contractor that they sign Seller standard individual forms regarding the protection of Personal Data. The parties consent to the processing of their respective Personal Data. In particular each party agrees expressly that the other party communicates the received Personal Data to any service provider in- and outside the EU for performing this Contract, including for accounting, financing and contract management purposes.

26. Force Majeure

Seller shall not be liable for failure or delay in shipping or delivery of goods, if such failure or delay is due to an act of God, fire, flood, war, labor difficulties, accidents, strikes, lockouts, civil disorders, governmental priorities or embargoes, inability or difficulty in obtaining raw materials or supplies at contracted raw material prices or any other reasons which are beyond the control of Seller.

27. Governing Law

The terms and conditions of this Contract shall be exclusively governed by and construed in accordance with the substantive laws of Switzerland, excluding its conflict of laws principles and excluding the UN Convention on Contracts for the International Sales of Goods. Any dispute, controversy or claim arising out of or in connection with any Contract as defined, including governing law, validity, invalidity, breach or termination, that cannot be settled amicably within sixty (60) days shall fall within the exclusive jurisdiction of the competent court in Geneva, Switzerland.
